Speaker Introduction

- **Speakers Bio:**

- **Steve Corwin** is a software architect with over 20 years experience building reliable and scalable systems. He worked with microservices before microservices were cool.

- **Ken Aung** is a software engineering leader with passion in building engineering teams for quality products and distributed systems. He had worked in Healthcare, SaaS, Education and Data Lifecycle domains; he is currently leading engineering teams in ResMed's Digital Health Technology function.

Speaker Introduction

- **Speaker Bio:** Paul Webber has been involved in the software industry for over 25 years programming in languages such as SmallTalk, C++, Java and Android. He has worked in many domains in the San Diego area with a strong interest in Agile Development practices. He has been involved in several volunteer organizations such as the Boy Scouts of America, Botball, The League of Amazing Programmers and the 100 Year Starship Program; giving back to the community. Paul has been the President of the SDJUG since 2001, actively coordinating the monthly meetings. Currently he is working at ResMed, a company committed to changing lives with every breath.
- Oracle Java Champion

Today is your day to inspire.

Today is your day to make a difference.

Today is your day to challenge yourself.

Thank You ResMed!

Today is your day
